

Monadol CF is a combined therapy for cold and flu combination of three ingredients Paracetamol, caffeine and Chlorpheniramine

Composition: Each tablet contains: Paracetamol 500mg, Caffeine 65mg, and Chlorpheniramine maleate 2mg

Pharmacological Group: Antipyretics, analgesic, Antihistamine

Indications:

Monadol relieves the following symptoms associated with the common cold, hay fever or other upper respiratory allergies Minor aches and pains, Headache, Sneezing, Muscular aches, Itchy, watery eyes, Runny nose, Sore Throat, Itching of the nose or throat & Fever

Action:

It is a comprehensive cold preparation, producing rapid and long-lasting relief from cold symptoms. Chlorpheniramine controls rhinorrhea, sneezing, and itchy and watery eyes associated with elevated histamine levels. Paracetamol reduces fever and relieves headache, muscle and joint aches and pains. It also contains caffeine, to help counteract possible drowsiness from the antihistamine.
